water consumption tariffs and regulation aims to provide a statistical overview about water abstraction consumption tariffs and data on sewage and wastewater treatment at an international level it is mainly based on the statistical information provided by iwa specialist group on statistics and economics the book is structured in three main parts part i presents tables and figures relative to water consumption and sanitation status and focuses on water abstraction water delivered water consumption and the evolution of sewer connection and wastewater treatment part ii focuses on the analysis of water tariffs by investigating the structure of water tariffs by analysing the importance of the variable and fixed charge it presents drinking water tariffs and illustrates the relationship between tariffs and gdp and also the size of the cities finally charges in wastewater are dealt with country by country part iii analyses the main aspects relative to water regulation and describes the importance

of private operators in the management of the water cycle information relative to the principles used to fix drinking water prices is presented with an assessment of access to public water services

anaerobic sewage treatment optimization of process and physical design of anaerobic and complementary processes focuses on process design and deals with start up procedures and steady state performance of uasb reactors as well as the influence of operation on reactor performance

this book covers the topic of microplastics in water and wastewater the chapters start with introductory issues related to the growing interest in the scientific community on microplastics and the human water cycle and point out where the microplastics could interact with water the subsequent chapters examine evidence of the microplastic presence in freshwater such as in both rivers and lakes in freshwater biota and hazardous chemicals associated with microplastics in such systems another set of chapters discuss the presence of microplastics in wastewater their sources their transfer through a wastewater treatment plant the concentration of microplastics in effluents throughout the world the plastic biomedia used in wastewater treatment plants and the effect on the surrounding environment of effluent wastewater pipes these chapters also discuss the sampling methods the sample treatment and analysis techniques used so far for microplastics in wastewater additionally the presence of microplastics in sewage sludge and in soils irrigated with wastewater or fertilized with sludge are discussed the possible impact of plastics and their additives on plants microalgae and humans are reviewed and presented in a critical way finally a chapter summarizes all the relevant regulations and initiatives that point to the necessity of a global directive for the protection of the environment from plastic and microplastic pollution the topic of microplastics in freshwater systems and in wastewater has scarcely been studied and requires more attention microplastics in water and wastewater aims to bring these initial findings to the attention of a broader audience and especially to operators and managers of freshwater and wastewater systems it will also be helpful to people already aware of the marine debris problem to understand the sources of microplastics in the oceans from freshwater systems and wastewater treatment plants

the anaerobic process is considered to be a sustainable technology for organic waste treatment mainly due to its lower energy consumption and production of residual solids coupled with the prospect of energy recovery from the biogas generated however the anaerobic process cannot be seen as providing the complete solution as its treated effluents would typically not meet the desired discharge limits in terms of residual carbon nutrients and pathogens this has given impetus to subsequent post treatment in order to meet the environmental legislations and protect the receiving water bodies and environment this book discusses anaerobic treatment from the perspective of organic wastes and wastewaters municipal and industrial followed by various post treatment options for anaerobic effluent polishing and resource recovery coverage will also be from

the perspective of future trends and thoughts on anaerobic technologies being able to support meeting the increasingly stringent disposal standards the resource recovery angle is particularly interesting as this can arguably help achieve the circular economy it is intended the information can be used to identify appropriate solutions for anaerobic effluent treatment and possible alternative approaches to the commonly applied post treatment techniques the succeeding discussion is intended to lead on to identification of opportunities for further research and development this book can be used as a standard reference book and textbook in universities for master and doctoral students the academic community relevant to the subject namely faculty researchers scientists and practicing engineers will find the book both informative and as a useful source of successful case studies

steal this file sharing book tackles the thorny issue of file sharing networks such as kazaa morpheus and usenet it explains how these networks work and how to use them it exposes the dangers of using file sharing networks including viruses spyware and lawsuits and tells how to avoid them in addition to covering how people use file sharing networks to share everything from music and video files to books and pornography it also reveals how people use them to share secrets and censored information banned by their governments includes coverage of the ongoing battle between the software video and music pirates and the industries that are trying to stop them
